

## **Read Me First... Important Notice**

The AvAr Class Application is an Adobe "PDF" file.  
You must have Adobe Acrobat Reader 6.0 or higher.

Version 6: You will get two gray-screen warning messages, and  
Respond "OK" to the first one, and "Cancel" to the second.  
Version 7: Should display form immediately.

To download a newer version, go to: [www.adobe.com/products/acrobat/readstep2.html](http://www.adobe.com/products/acrobat/readstep2.html)

If you get a white screen after your Adobe Reader 6 loads,  
go to your Explorer Tool Bar and do a "Refresh".

Also, the display of web pages can be significantly affected by  
one's Temporary Internet Files and Cookies folders.  
Please regularly clean out these two folders on your computer,  
or call your pc support person to assist you in this matter.

Your response time for load Adobe and the Class Application will  
vary accordingly to your modem or broadband connection AND  
will vary depending on the 'class' of your machine,  
ie. Pentium II, III, or IV.

The version of Windows has no significant effect on your display rate.

Also, the version of your Microsoft Internet Explorer may affect the  
display rate, version 5.5 or higher is suggested, version 6.0 is  
preferable. Go to [www.windowsupdate.microsoft.com](http://www.windowsupdate.microsoft.com) to upgrade.

The other documents listed are MS Word "doc" files and should  
display okay on your computer, depending on the version of Word.

Sorry for any inconvenience, we are trying hard to work out all the  
idiosyncrasies of a new website and a new educational program.

Lance Barber  
CAHS Vice President

(ps... I too get the "white screen" first before the Class Application  
displays and must "Refresh". My machine is an old Pent. II with Windows 98 SE.)
